Art Unit: 1651

The application should be reviewed for errors. error occurs, for example in the specification in the recitation at page 3, lines 2-3 "in which such oxidase [lacuna] responsible for a step in tyrosine catabolism...".

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/15/03 has been entered.

Claims 1, 3-4, 6-8 and 12-13 are being considered on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3-4, 6-8 and 12-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is vague and indefinite in the recitation of "in the presence of a... HPPD inhibitor", since it is doubted that in the "presence" of large amounts of any inhibitor the reaction would succeed. The specification suggests that 100 μ M are used (Specification, page 8, line 9.)

Claims 1, 3-4, 6-8 and 12-13 are incomplete in the absence of a recovery step for the homogenisate product produced.

While there is no specific rule or statutory requirement which specifically addresses the need for a recovery step in a process of preparing a composition, it is clear from the record and would be expected from conventional preparation processes that the product must be isolated or recovered. Thus, the claims fail to particularly point out and distinctly claim the "complete" process since the recovery step is missing from the claims. The metes and bounds of the claimed process are therefore not clearly established or delineated.

Claim 6 is vague and indefinite in the recitation of "can grow of HPA...", since it is unclear under which circumstances this growth does or does not occur. Deletion of "can" would be remedial. Cf. claim 3.

Art Unit: 1651

Claim 13 is confusing in that the origin of the "protein extracts" is uncertain.

Amendment to "protein extracts from bacteria, yeast or plant cells" would be remedial.

No claim is allowed.
